

Farah Aziz
MLOps Engineer
farah.aziz@example.com | Cairo, Egypt

SUMMARY

MLOps engineer with 5 years taking machine learning models from experimentation to reliable production deployment on Kubernetes.

SKILLS

Python, PyTorch, Kubernetes, MLflow, Docker, AWS

EXPERIENCE

Senior MLOps Engineer, Nileflow AI (2021-Present)

- Built a Kubernetes-based model-serving platform running 20+ PyTorch models in production for internal data science teams.
- Set up MLflow for experiment tracking and model versioning, replacing ad hoc notebook-based tracking.
- Automated model deployment pipelines in Python, cutting time from trained model to production endpoint from days to hours.

Machine Learning Infrastructure Engineer, Delta Compute (2019-2021)

- Containerized existing ML training jobs in Docker, standardizing the team's training environment across AWS EC2 instances.
- Built monitoring for model prediction drift, alerting the data science team to two significant model degradations.

EDUCATION

M.S. Computer Science, Cairo University
